

Environmental Initiatives Townhouse Hotel & Conference Centre

In place as per March 2010

- Used batteries are collected in a glass box to raise awareness, and then recycled
- CFL bulbs and fluorescent tubes are sent for recycling
- Reusing printed pages by writing or printing on the back (where suitable)
- Air conditioners are switched off in the rooms when unoccupied (as a part of the daily routine)
- Towel and linen policy in the hotel rooms; towels and linen are only laundered on request from long staying guests
- Air conditioners are switched off in conference venues when not in use (as a part of routine)
- Using Typek 50 % recycled paper
- Using biodegradable chemicals in all F&B outlets
- Used cooking oil is recycled and used to make bio diesel
- Using biodegradable chemicals in the laundry
- Replacing halogen and incandescent light bulbs with CFL bulbs as an ongoing process
- An environmental committee is in place
- Use FSC-certified pencils in the conference center
- Printer cartridges are being refilled
- Source and contract a waste management company to handle recycling
- Recyclable water bottles with a recycled glass content in use
- Participating in an environmental community project Alien Clearing
- Puro Fair-trade coffee in use in the conference centre and hotel

In progress as per March 2010

- Sourcing suitable water saving showerheads
- Shorten automatic cycle for lighting in the conference center when not in use by reprogramming the motion sensors
- Establish environmental impact of content of guests amenities
- Investigating possibility of refilling of guest amenities
- Environmental policy design
